Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 7, 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Shinichiro Kawamura (JP 61-42628).

Regarding claim 1, Shinichiro Kawamura discloses an overhead projector system comprising:

a projector assembly including a transparency stage (fig. 1 transparency 4); adjacent said stage, a scanner assembly for digitizing content of a current transparency on said stage (sensor 7); and an output device (port 13) for extracting said content from said system (fig. 1, page 5, second paragraph through page 10, first paragraph).

Regarding claim 2, Shinichiro Kawamura discloses the system as set forth in claim 1 further comprising: associated with said scanner, a hard copy apparatus internal to said projector assembly for providing a hard copy output of said current transparency (fig. 1, port 13).

Regarding claim 3, Shinichiro Kawamura discloses the system as set forth in claim 1 wherein the output device comprises: at least one digital data sending device (page 8, second paragraph).

Regarding claims 4, 7 and 10, arguments analogous to those presented for claim 1 are applicable to claims 4, 7 and 10.

Regarding claim 9, arguments analogous to those presented for claim 3 are applicable to claim 9.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5, 6, 8 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shinichiro Kawamura (JP 61-42628) and further in view of Kiyoshi Hasegawa (JP 61-30167).

Regarding claims 5, 8 and 11 Kiyoshi Hasegawa discloses overhead projector/printer apparatus that supplies digital signal from the line sensor to an external device (page 12 last line through page 13 first paragraph). Therefore, it would have been obvious to a person of an ordinary skill in the art at the time the invention was made to add this extra feature of Kiyoshi to Shinichiro's apparatus for further processing of the digital signal.

Art Unit: 2622

Regarding claim 6, neither Shinichiro nor Kiyoshi disclose an infrared signal output port. However, providing an infrared out put port in scanning device is well known and routinely implemented in the art. Therefore, it would have been obvious to a person of an ordinary skill in the art at the time the invention was made to add this extra feature to Shinichiro's apparatus for further enhancing the design.
